

Fall alerts, sent to the people who care.

Radar-based monitoring that notifies care staff and family when a possible fall is detected.

Illustrative sensor image. Hardware may vary.

No camera.

-

No wearable.

-

No button.

HOW IT WORKS

01

Monitor

Private radar sensing, 24/7.

02

Detect

Watches set areas for possible falls.

03

Notify

Calls and texts staff and family.

04

Respond

Staff follow care procedures.

INSTALLED & SUPPORTED

- ✓ Bedroom and bathroom coverage checks
- ✓ Staff training and response testing
- ✓ Connectivity monitoring
- ✓ Tech support and maintenance

PRIVACY-CONSCIOUS

No photos or video, ever. Data collection, access, and retention details are shared before enrollment.

Disclaimer: Sensors may miss falls or generate false alerts. Coverage depends on installation and room conditions. Alerts supplement existing care procedures; they do not prevent falls or guarantee response times. Power or connectivity interruptions can affect monitoring and alert delivery.
